DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see arguments and translation documents, filed 07/12/2004, with respect to claims 1-17 have been fully considered and are persuasive. The rejection of 02/11/2004 has been withdrawn.

Allowable Subject Matter

2. Claims 1-17 are allowed.
3. The following is an examiner's statement of reasons for allowance:

A search of the prior art did not disclose a liquid crystal display device comprising a combination of structural elements, more specifically:

(a) The first orientation film includes a ferroelectric liquid crystal polymer, and a nematic liquid crystal layer between the first and second substrates.

(b) Forming a first orientation film having a ferroelectric liquid crystal polymer on the first electrode, and forming a nematic liquid crystal layer between the first and second substrates.

The closest prior art by Yamamoto et al. (U.S. Patent No. 5,444,651), discloses a memory device having a liquid crystal material (53), alignment (orientation) films (56, 56') on the first and second electrodes. Yamamoto, discloses ferroelectric polymeric liquid crystal (col. 13, line 40). However, the ferroelectric polymeric liquid crystal disclosed by Yamamoto is the liquid crystal material itself (53) and not the alignment films (56, 56'). The alignment films as disclosed by Yamamoto are formed by polyimide coatings (col. 8, lines 55-58).

Hence, Yamamoto does not teach that the alignment film (orientation film) includes a ferroelectric liquid crystal polymer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
